

# User Calculated Traces

User Calculated Traces (UCT) is a web-based editing tool for creating, testing and displaying custom calculations. Using real-time trace data, these calculations can be one-line formulas, or page-long algorithms—whatever you need.

- 1 An interface designed for **ease-of-use**
- 2 Common **Excel-like** math expressions and logic
- 3 Keep your intellectual property **secure** and confidential
- 4 Variables to **test your ideas**
- 5 Instant results based on **1-second** EDR data
